

Abbott *Aesthetics*

Welcome to Abbott Aesthetics: a boutique medical practice opening this Spring on West Lovers Lane. The practice is the vision of Dr. Meredith Abbott, a Board-certified Ophthalmologist fellowship trained in Oculofacial Plastic Surgery. With a commitment to detail and a passion for design, Dr. Abbott created a beautifully decorated office to make you feel at home.

For the past ten years, Dr. Abbott has been helping patients look and feel their best in the DFW metroplex. Her most common surgical procedures include upper and lower eyelid blepharoplasty, eyelid ptosis repair, treatment of benign and malignant skin tumors around the eye, and lacrimal (tearing) surgery. Dr. Abbott is excited to offer more nonsurgical methods of rejuvenation not limited to injectables, laser treatments, microneedling, and more.

PHOTOGRAPHY BY VANESSA GAVATYA

Her approachable bedside manner, exceptional communication, and her own passion for health and beauty has made her a trusted partner for both her patients and referring doctors across North Texas.

Dr. Abbott is excited to create a new practice where she can combine her unparalleled surgical experience with additional aesthetic medical procedures. This unique approach will ensure patients receive experienced, compassionate medical care with the concierge treatment we all deserve.
